THE JOURNAL

—OF THE—

FRANKLIN INSTITUTE,

DEVOTED TO

SCIENCE AND THE MECHANIC ARTS.

EDITED BY

Dr. H. W. Jayne, Chairman; Mr. Edwin Swift Balch, Ph.D., Dr. Persifor Frazer, Mr. Louis E. Levy, Prof. Coleman Sellers, E.D., Committee on Publications;

with the Assistance of

Dr. Wm. H. Wahl, Secretary of the Institute.

VOL. CLVIII.—Nos. 943-948.

(79TH YEAR.)

JULY-DECEMBER, 1904.

PHILADELPHIA:

Published by the Institute, at the Hall, 15 South Seventh Street.

1904.

JOURNAL OF THE FRANKLIN INSTITUTE.

Vol. CLVIII.—July-December, 1904.

INDEX.

Abercrombie, W. R. The Copper River Country, Alaska 289, 353
Absorption process for butter, Taylor's. Report on 233
Alaska, tin in 75, 127
Aluminum conductors 469
Ammonia, sources of (*see* Terne).
Arc lamp, Steinmetz's magnetite 464
Architectural design, the execution of. (Harris) 65
Asbestos production 393

Baldwin Locomotive Works, organization and methods of explained. (Henszey) 303
Bamboo 239
Blast-furnaces, mechanical appliances at 96
BOOK NOTICES 78, 155, 240, 469
Borax in the United States 395
Boundaries of the United States 154
Brake efficiency on motor cars 232
Bronze for heavy guns 154
Butter-making, Taylor's absorption process for. Report on 233
By-product coke-oven industry, progress of. (Terne) 421

Campbell, W. Change of structure in the solid state 161
Chemical analysis of rocks 137
Circuit-breakers. (Scott) 185
Coal in Nevada 317
Coke-oven industry, utilization of by-products of. (Terne) 421
Copper or copper alloys, tempering 235
River Country, Alaska. (Abercrombie) 289, 353
sulphate as a water purifier. (Discussion) 319
Cryostase 64
Cyanide of cacodyl 120

Damming the Thames 410
Day, Charles. Electric motor driving of machine tools. (Discussion) . 321
De Forest, Lee. Electrolytic receivers in wireless telegraphy 241
DISCUSSION. Copper sulphate as a water purifier. (Hare, Cochran, Trautwine, Martin and others) 319
Individual operation of machine tools by electric motors. (Day, Dunn, Duncan, Emerson, Kimball, Lozier, Christie, Thomson, Cooper) 321
Distillation of metals 319
Distilling apparatus, modern, efficiency of 64
DROWN, THOMAS MESSINGER, obituary notice of. (Frazer) 465

137949

Electric motors for driving machine tools. (Discussion) 321
railways, the storage battery as applied to. (Winship) 129
Electrical transmission of pictures and script 261
Electricity direct from coal 76
Electro-chemical developments, recent 316
Electrolytic converter for x-ray work 437
method of estimating gold 236
process for copper, Siemens & Halske's 240
Elements, two new 96
Elmore Copper Works at Schladern 23
Emery wheels, solid, experimental work with. (Paret) 97
Empty car-haul, the 184
Expanding and flanging machinery and tools. (Lovekin) 43
Experimental work with solid emery wheels. (Paret) 97

Ferrell's process for fireproofing woods. Report on 139
Ferro-concrete railway ties 262
Fixation of atmospheric nitrogen (*see* Terne).
Flint, feldspar and fluorspar 236, 395

FRANKLIN INSTITUTE:
Committee on Science and the Arts:
Reports:
Rinn's tent-fastening device, 79; Knudson's apparatus for preventing corrosion by electrolysis, Dodge's coal storage structure, 80; Doble's tangential water-wheel, 157; Wheeler's electric "buzz" fan, Seitz's coal-loading and screening machine, 158; Lattig's electric semaphore signal, Campbell's reconstructed milk, 159; Goldschmidt's "alumino-thermic" methods, Burrow's feed-water regulator, 160; Ferrell's process and apparatus for fireproofing wood, 139; "Kodak" developing machine, 145; Sprague's "multiple-unit" system of electric traction, 148; Taylor's butter-making process, 233; Loss' hydraulically-forged steel car wheels, 398; North Brothers' ratchet-tools, 399; Falkenau-Sinclair wire-testing machine, Lovekin's expanding and flanging machinery and tools, Otto suction gas producer 471
Williams, Dr. W. J., elected as member 80
Correspondence:
Controlling the floods of the Mississippi. (Van Meerten) 310
The International Congresses at the St. Louis Exposition. (Haupt) . 392
Proceedings of Stated Meetings:
June, 1904, to November, 1904 . . . . . 79, 319, 398, 471
Sections:
Proceedings of 400, 474

Garbage, the coke-oven process applied to the utilization of. (Terne) . 421
Garnet, as an abrasive 468
Gas engine, water required for 352
Gilsonite and elaterite 76

Hardening iron, process for 237
Hare, Hobart A. (and others). Copper sulphate as a water purifier . . . 319
Harris, John McArthur. The execution of architectural design . . 65, 121
Haupt, Lewis M. (*see* Correspondence).
Henderson process of copper extraction 397
Henszey, J. Wilmer. Organization and methods of a modern industrial works 303

Illmer, Louis, Jr. Proposed modification of the perfect heat-engine formula 367
Industrial notes. (Terne) 421
International Congresses at the St. Louis Exposition. (Haupt) 392
Iron, process for hardening 237

Job, Robert. Results of an investigation of the durability of paints for the protection of structural work 1
Jones' underfeed stoker. Report on 433

"Kodak" developing machine. Report on 145
Krupp steel works, employees in 464

Lovekin, Luther D. Modern expanding and flanging machinery and tools 43
Lunar changes 438

Magnetite arc lamp, Steinmetz's 464
Melville, Geo. W. The naval strength of the United States 209
Messer, C. J. Telpherage 263
Mica, production of in 1902 153
Mine explosion at Johnstown. (Moore) 81
Mining (metalliferous) in Great Britain, decline of 24
Modern industrial works, organization and methods of. (Henszey) . . 303
Moore, Geo. T. Fixing atmospheric nitrogen 434
M. G. The mine explosion at Johnstown, Pa. 81
Morris Canal, end of the 75
Morse, Wm. F. The utilization and disposal of municipal wastes . . . 25
Motor cars, brake efficiency on 232
driving for machine tools. (Discussion) 321
Municipal steam heating in Dresden 238
waste, utilization and disposal of. (Morse) 25

Naval strength of the United States. (Melville) 209
Nernst lamp, efficiency of the 318
Nitrogen, atmospheric, Moore's process for 434
"N" rays, penetrating power of 208

Obituary. Thomas Messinger Drown. (Frazer) 465

Opals, Australian 120
Outerbridge, A. E., Jr. The molecule, the atom, and the new theory of matter 411

Paints for structural work, dnrability of. (Job) 1
Paret T. Dunkin, Experimental work with emery wheels 97
Patent laws, British, change in 237
Perfect heat-engine formula, proposed modification of. (Illmer) . . . 367
Petroleum, statistics of 394
Photolinol 184
Precious metals in the arts 96
Pyrrhotite as a source of sulphur 394

Quicksilver mines in Peru 396

Radium and the diamond 394
and terrestrial heat 232
emanations, absorption of, by water and petroleum 138
in mineral waters 64
life history of 396
Registering compass 262
Rusting of iron 155

Scott, W. M. Circuit-breakers 185
Simplon tunnel 137
Soft-coal industry, growth of 288
Spontaneous ignition of coal 352
Sprague's multiple-unit system of electric traction; report on 148
Steam boilers, ratio of grate surface to heating surface 152
turbine and the reciprocating engine, relative efficiency of 397
Steel chimneys 239
railway ties 438
strength of, at high temperatures 410
Steinmetz's magnetite arc lamp 464
Stoker, Jones' underfeed. Report on 439
Storage battery as applied to electric railways. (Winship) 129
Sun spots, possible utility of the 317

Telpherage. (Messer) 263
Tempering copper or copper alloys 235
Terne, Bruno. Industrial notes 421
Theory of matter, the new. (Outerbridge) 411
Tin deposits of the York region, Alaska 127
in Alaska 75
Turbine ocean steamers 77

U. S. Navy, newest additions to 24

Van Meerten, H. (*see* Correspondence).

Wagon with two fifth-wheels 144
Water-power, comparative cost of 23
Windmill for electric power 317
Winship, W. E. The storage battery as applied to electric railways . . 129
Wireless telegraphy, electrolytic receivers in. (De Forest) 241

Yarn manufacture, improvement in 63
